

Flossbach von Storch - Dividend - R

INVESTMENT STRATEGY

Flossbach von Storch - Dividend is a globally diversified equity fund with an active investment approach. The focus is on first-class companies with an attractive dividend profile. What is important here is not only the dividend yield, but above all dividend security and dividend growth potential. When selecting individual securities, the fund management relies on in-house valuation models as well as ESG questions, engagement, and voting. In addition, exclusion criteria defined within the framework of the Sub-Fund's investment policy are taken into account. At least 75 per cent of the Fund's assets are invested directly in equities. In addition, the Fund may invest in share certificates and share index certificates as well as bonds, time deposits and target funds. The Sub-Fund is actively managed using an index as a reference basis. The portfolio is composed by the fund manager exclusively in accordance with the criteria defined in the investment policy, reviewed regularly and adjusted if necessary. The sub-fund is classified as an Article 8 product within the meaning of the Disclosure Regulation (EU) 2019/2088 (SFDR). For detailed information on the objectives and investment policy, please refer to the most recent sales prospectus and the Key Information Document (PRIIP-KID).

EXPLANATORY NOTES REGARDING PERFORMANCE

Gross fund performance (BVI method) takes into account all costs incurred at fund level (for example, management fees), net fund performance also takes into account the subscription fee. Further costs may be charged individually at customer level (e.g. custody fees, commissions and other charges). Example calculation (net method): An investor wishes to buy shares with capital of €1,000. Based on a maximum subscription fee of 5 %, € 50 will be deducted from their investment as a one-off initial charge. In addition, custody fees may also be applied, which will further reduce the investor's return. The level of custody fees can be found in your bank's schedule of fees and services. **Please refer to the cost details presented in this document to determine the maximum subscription fee for the share class of the sub-fund.** The reference index is merely informative. It does not constitute any obligation from the fund manager to track the index or achieve the same performance. **Past performance is not a reliable indicator of future performance.**

MONTHLY COMMENTARY

The reporting season for the third quarter began in October, with economic signals showing mixed dynamics. Demand has cooled in many sectors, and the financial markets in Germany and the Eurozone were particularly disappointing. However, alongside companies with weaker performance, there are others demonstrating high resilience in this environment. In addition to the earnings season, investor discussions in October were dominated by expectations regarding the US election on November 5. In this context, the global stock index MSCI World (calculated in euros) gained 0.8%. The strength of the US dollar, which rose by 2.3% against the euro, also had a positive effect. The three largest positive contributors to portfolio performance during the reporting period were Taiwan's TSMC, US technology giant Alphabet, and the UK's Reckitt Benckiser. The three biggest negative contributors were US life sciences and diagnostics company Danaher, consumer goods company Colgate, and US-based Thermo Fisher. There were no significant purchases or sales in the portfolio over the reporting period.

GLOSSARY

¹ Current dividend yield of portfolio companies weighted by portfolio share.

² Portion of dividend distribution from free cash flow weighted by portfolio share.

³ Rate of increase p.a. of the last announced dividend vs. the dividend five years ago, weighted by portfolio share.

⁴ Number of years since portfolio companies have paid dividends without interruption, weighted by portfolio share.

Flossbach von Storch - Dividend - R

OPPORTUNITIES

- + These funds aim to exploit growth opportunities on global equity markets.
- + Investing in assets denominated in a foreign currency can have a positive impact on unit values as a result of exchange rate movements.
- + Derivatives can be used to increase potential yields.
- + Potential to achieve above-average dividend income.

RISKS

- Equity markets and thus also unit values can experience severe fluctuations in response to market developments. The result can be a fall in the trading price. ESG criteria can restrict the selection of target investments in terms of category and number, sometimes considerably.
- Investing in assets denominated in a foreign currency can have a negative impact on unit values as a result of exchange rate movements.
- Where used, derivatives can have a greater negative impact on the fund value than would be the case if the assets were acquired directly. This can affect the fund's risk profile and volatility (tendency for the price to fluctuate).
- If dividends are reduced or not paid out at all, this can have a negative impact on investment returns.
- By hedging currency risks, the fund share value may be adversely affected.

Please read the Prospectus and particularly the RISK WARNINGS section and the specific annex of the subfund to understand the risks and benefits of this product.

INVESTOR PROFILE

GROWTH-ORIENTED:

The fund is appropriate for growth-oriented investors. Due to the composition of the net sub-fund assets, there is a high degree of risk but also a high degree of profit potential. The risks may consist in particular of currency risk, credit risk and price risk, as well as market interest rate risks.

INVESTMENT HORIZON:

Long-term: over 5 years

RISK INDICATOR

Lower risk ← Higher risk →

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level, and poor market conditions could impact our capacity to pay you.
