WHAT IS THIS PRODUCT?

Type: The product is a share class of the Flossbach von Storch - Bond Defensive sub-fund, which is part of the Flossbach von Storch fund, a Luxembourg investment fund (fonds commun de placement – FCP) that has been established in the form of an umbrella fund and is subject to Part I of the Luxembourg Law of 17 December 2010 (Law of 2010), as amended, and thus qualifies as a UCITS. The assets and liabilities of each sub-fund are segregated by law.

Term: The product has an unlimited term. Notwithstanding this, the product may at any time be liquidated by the Management Company. As a rule, investors can redeem their units on any Luxembourg banking day except 24 and 31 December. The manufacturer may suspend redemption if exceptional circumstances make this appear necessary when investor interests are taken into account.

Objectives:

The objective of the investment policy of the Flossbach von Storch - Bond Defensive (the "sub-fund") is to achieve reasonable growth while taking into consideration the risk involved for the investors. To achieve the investment objectives, the sub-fund assets are invested in accordance with the principle of risk diversification in interest-bearing securities of all types (including corporate bonds, zero coupon bonds, inflation-linked bonds, variable-interest securities), money market instruments, fixed-term deposits, derivatives and cash. The sub-fund does not invest in equities, either directly or indirectly. The sub-fund does not invest in subordinated or convertible bonds or in high-yield bonds (bonds without an investment grade rating). The duration of the sub-fund should not exceed four years. The sub-fund can acquire assets in foreign currencies and can therefore have a foreign currency exposure. The aim is to hedge the foreign currency exposure of the fund by means of currency derivatives. Depending on the market situation, the net foreign currency exposure of the fund may fluctuate within a range of between -5 per cent and +5 per cent. Units in UCITS and other UCI ("target funds") may not be acquired. The use of derived financial instruments ("derivatives") is planned in order to achieve the aforementioned investment objectives, as well as for investment and hedging purposes. The sub-fund is actively managed. No index is used for comparison purposes. The current sales prospectus provides detailed information on the above and other investment opportunities available to the sub-fund. As a rule, investors can redeem their units on any Luxembourg banking day except 24 and 31 December. Unit redemption can be suspended if exceptional circumstances make this appear necessary when investor interests are taken into account. This sub-fund may not be suitable for investors that want to withdraw their capital from the sub-fund within a period of 3 years. This unit class does not distribute any income to investors, but instead reinvests it. The sub-fund promotes environmental and social characteristics as defined in Article 8 of Regulation (EU) 2019/2088. Flossbach von Storch follows a holistic sustainability approach across the group: As a long-term investor, Flossbach von Storch attaches importance to companies dealing responsibly with their environmental and social footprint and actively counteracting negative impacts of their activities.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Summary Risk Indicator

The summary risk indicator ("SRI") is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 2 out of 7, which is a low-risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the fund to pay you.

The risk indicator assumes you keep the product for a minimum of 3 Years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

Unusual market conditions could arise, for example, due to currency, creditworthiness, price, counterparty, liquidity and interest rate risks, as detailed in the sales prospectus.

This product does not include any protection from future market performance. Please refer to the 'Risk' section of the prospectus for more details.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product/a suitable benchmark completed where applicable by that of its reference framework over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 3 Years Investment: 10 000 EUR			
Scenarios Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		If you exit after 1 Year	If you exit after 3 Years

Moderate: This type of scenario occurred for an investment between February 2018 and February 2021.

Favourable: This type of scenario occurred for an investment between December 2018 and December 2021.

WHAT HAPPENS IF FLOSSBACH VON STORCH INVEST S.A. IS UNABLE TO PAY OUT?

The sub-fund assets are segregated from the assets of the Management Company. The Depositary is responsible for holding the assets of the fund in safekeeping. If the Management Company defaults, it will have no direct financial effect on the sub-fund. In addition, the sub-fund assets are segregated from the assets of the Depositary, which reduces the risk of the sub-fund suffering a loss if the Depositary defaults. There is no investor compensation or guarantee scheme if the Management Company or the Depositary defaults.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- EUR 10 000 is invested.

	If you exit after 1 Year	If you exit after 3 Years
Total Costs	68 EUR	216 EUR
Annual Cost Impact	0.7 %	0.7 % each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.0% before costs and 1.3% after costs.

We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs
